---

### Backend developer at Canplast (2023-present)

Some of my main tasks here are create CI/CD Pipelines for different Node.js API deployed in EC2 AWS instances with Github Actions and also develop new features and refactor using newer versions of Node.js for these API

### Backend developer/Cloud Engineer at Hammerbyte Games (2021-2023)

Working with game developers to integrate microservices developed using technologies like Node.js, MongoDB also AWS technologies like, Gamelift, Lambda, S3, dynamoDB, Apigateway, EC2 used on video games in order to persist data developing an architecture for the backend of a beta game to match players and lift servers for multiplayer.

### Web developer freelance (2020-2021)

Developing web apps and landing pages for small businesses using technologies like HTML, CSS, Vanilla JavaScript, Node.js, Express, MongoDB, React, Redux.

### Web developer at ProKarma/Gammapartners (2019-2020)

Giving maintenance and adding new features to a web application using web technologies like Node.js, Sails, Angular and PostgreSQL. This application was the main product of a startup located in Chicago and therefore we had to have good communication with the project manager having frequent scrum meetings.

---
